Social psychology is an area in the discipline of scientific psychology that seeks to understand how people feel, think, and behave in social situations. The professors in this class are social psychologists who have conducted scientific studies and have published articles on a variety of topics in social psychology. The first half of the course (through March 2nd) will be covered by Ms. Hasel and the last half of the course (March 5th through the end of the semester) will be covered by Dr. Madon.

**Required readings book:** *Current Directions in Social Psychology*, 2004, Rusher & Hammer (Eds), Pearson/Prentice Hall.

**Course note packets:** Course notes are available on WebCT Cardinal and on each professor’s homepage.

*WebCT:* [http://www.celt.iastate.edu/webct/](http://www.celt.iastate.edu/webct/)

*Homepage for Ms. Hasel:* [http://www.public.iastate.edu/~lhasel/homepage.html](http://www.public.iastate.edu/~lhasel/homepage.html)

*Homepage for Dr. Madon:* [http://www.psychology.iastate.edu/faculty/madon/homepage.htm](http://www.psychology.iastate.edu/faculty/madon/homepage.htm)

**Exams:** There will be four exams, each comprised of 50 multiple-choice questions and 2 short-answer questions.

Each exam will include at least 15 multiple-choice items and one short-answer item that are *not* in either of the books but instead will come from lecture material. The fourth exam is not comprehensive and must be taken on the exam date by all students. All exams, except exam 4, are held in the evening (6:30-7:45 p.m.) on the date of the exam (see exam schedule on page 2 of this syllabus). Bring photo identification and soft-lead pencil to each exam. An exam that is missed for *any* reason will require the student to take a *comprehensive* final exam immediately following the regularly-scheduled fourth exam.

**Pop quizzes:** There will be three pop quizzes prior to each exam for a total of 12 such quizzes. Each quiz will involve two short multiple choice questions, one from lecture and one from the textbook. The purpose of these quizzes is to reward those who are attending class and reading the assigned chapter(s) *before* they come to class. These quizzes will be closed book but you will be able to discuss your answers with those around you. The goal of discussion is to allow you to learn from and interact with the other students in the class. *You cannot make up a missed regular quiz.*
Current Directions Readings Quizzes: On the Monday prior to Exams 1, 2, and 3, there will be a four-question, multiple-choice quiz on the four Current Directions readings that were assigned for that exam period. The final reading quiz will be on the Monday of deadweek. All readings quizzes will be closed book. In addition, unlike regular quizzes in which discussion is encouraged, there will be no discussion among students for readings quizzes. If you miss a readings quiz for a legitimate reason, contact the professor within 48 hours.

Research Credits: 12 points in research credits are required for this course and 12 points can be gained through extra credit. There are two methods to obtain all of the research points: 1) participation in research studies and/or 2) further Current Directions readings which involve written essay answers to a select set of the readings. Students who opt to obtain some or all of their research credits through the Current Directions readings should note that, beginning on Jan 19, one essay will be due each week with the very last essay due on April 13. See the Lecture schedule for deadlines. Pages 7-8 of this syllabus explain these credits in detail.

Grading: Exams allow a maximum total score of 224 (four exams: 50 multiple choice questions - worth one point each, and two short-answer questions - worth 3 points each). Regular quizzes allow a maximum of 24 points (12 quizzes at 2 points each). Readings quizzes based on the Current Directions readings allow a maximum of 16 points (four quizzes at 4 points each). Required research credits are another 12 points. The number of points that you obtain out of the 276 possible points will be used to determine a grade distribution that approximates ISU norms for 200-level courses (i.e., 15% As, 30% Bs, 40% Cs, 13% Ds, 2% Fs). Extra credit (up to 12 points) will be added after the grade distribution is created. Starting about mid-semester, you can access your scores on the WebCT Cardinal URL address: http://www.celt.iastate.edu/webct/. Research credits will be updated on WebCT every few weeks. E-mail Berna Gercek, Kyle Scherr, or Rachel Reimer, not the professors, regarding questions or concerns about your scores. Any problems with your scores should be addressed ASAP, not at the end of the semester.

EXAM DATES:
Exam 1: Wednesday, January 31st (6:30 p.m.) Location TBA. Exam covers Chapters 1-4, plus all lecture material.
Exam 2: Wednesday, February 28th (6:30 p.m.) Location TBA. Exam covers Chapters 5-7, plus selected readings from SPA 2 and 3 chapters, plus all lecture material since previous exam.
Exam 3: April 4th (6:30 p.m.) Location TBA. Exam covers Chapters 8-10, plus all lecture material since previous exam.
Exam 4: During Exam week, (April 30th-May 4th). Date, time, and location TBA when University sets final exam schedule. Exam covers chapters 11-13, plus pages 474-503, plus all lecture material since previous exam.
Comprehensive Final: (Same date as Exam 4, immediate hour after Exam 4). Taken only by those students who missed a previous exam. Covers entire course; all chapters and lectures.

If you know you are going to miss an exam date, contact the appropriate professor for that exam at least two days prior to the exam. If you miss an exam date for unforeseen reasons, contact the professor at the earliest possible time.

Disability
If you have a documented disability that requires assistance, you will need to go to the Disability Resource (DR) Office for coordination of your academic accommodations. The DR is located in the Student Services Building, Room 1076. Their phone number is 515-294-6624, TDD 515-294-6335 or email Bea at Awoniyib@iastate.edu.

1 It is the student's responsibility to put the correct ID number and name on all exams, quizzes, and research participation cards. Failure to do so will result in no credit for that quiz, exam, or research participation session.

A Message to Students

Our intention in this course is to enhance your ability to analyze human social thought and behavior. Minimally, you should be able to consider the ways in which human social behavior is influenced heavily by errors in reasoning, attitudes, prejudices, misconceptions, and temporary situational factors. We hope that you will learn to temper your natural tendency to assume automatically that people’s behaviors reflect their inner dispositions, looking instead at the possibility that their behaviors are a common reaction to their situation and that you would probably behave the same way under these circumstances. It takes a skilled and knowledgeable observer to perceive and understand the influence of these nearly invisible but powerful situational forces on social behavior.

Your life is now, and will continue to be, filled with thousands of social encounters of considerable significance. Whether you are trying to understand a social issue, a friend, an enemy, a co-worker, a boss, an employee, a relative, a child, a lover, or yourself, there is no escaping the fact that having a scientific understanding of social thought and social behavior is an advantage over your lifetime. Given the goals that we have for this course, you can perhaps appreciate our enthusiasm for the student whose goal is congruent with ours rather than merely having the goal of achieving a particular letter grade.

Helpful Hints on How to Get the Most Out of This Course

ATTEND CLASS. Bright, highly motivated students who have superior study skills can learn alone most of what the book presents to you -- enough to do quite well on exam questions that cover the textbook material. However, a considerable amount of material that is not in the textbook will be presented during classes and a number of exam questions will come from material presented exclusively in lectures. Research has shown that one of the best predictors of grades in courses is class attendance, and even the brightest students gain more insight by attending classes regularly.

STUDY CHAPTERS EARLY. Some lectures overlap with information in the book, but even for lecture material that is not redundant with the book, you will learn best by reading/studying the assigned chapters by the date on which they are indicated on the syllabus. Students who read the chapters prior to class will find it rewarding when the quiz questions occur. We will assume in lectures that you have covered the assigned chapters, and hence will not focus unnecessarily on terms/concepts that are well defined in the book. There will be exceptions to this because in some lectures we choose to emphasize particular concepts that are covered in the book or we believe that the book does not cover that material particularly well. However, lack of emphasis or coverage during lectures does not mean lack of importance of material in the book. You should strive to complete assigned chapters on time and several days before an exam. Studying early leaves much more time for resolving difficulties and reviewing the material -- repetition is a fundamental principle of learning.

READ, STUDY, AND TAKE NOTES "ACTIVELY." Research shows that many individuals read and write passively, that is, without thinking about the meaning of what they are covering. In reading and studying textbook-type material, everyone (professors included) must read actively and as a result somewhat slowly. You must try to understand what you are trying to learn within the framework of what you have already learned. Research shows that learning is much more effective if new information is related to old information. Not only must you work on textbook material actively, but you must also stay mentally active during class. Passively writing down what is on the overhead screen or what we say in class without thinking about it -- about how it fits with previous material in earlier classes or earlier in that lecture -- will not help you learn or understand the material. Rewrite your notes as soon after class as possible.
BEFORE BEGINNING A CHAPTER, ACTIVELY STUDY THE SUMMARY FIRST. Also, you should page through the chapter reading headings and illustrations actively to gain a good general understanding of major themes and ideas. These major ideas serve as part of the framework for you to organize the more detailed information if you are to gain a good overall understanding.

OUTLINE EACH CHAPTER. By outline, we mean that you should take organized notes on the chapter as you go through it the first time, just as though you were taking notes on a lecture. Research shows that taking good notes requires active thinking and is much superior to helping you learn any material to underlining or highlighting text material. If you take good notes on chapters, you should be able to study primarily from these notes without having to reread text material. In the long run, that will save you time, particularly as you become more and more skilled (through practice) at taking quality notes on text material. These notes and your lecture notes should be reviewed as many times as feasible in preparation for each exam. Your textbook notes will also give you a manageable amount of material that you can review in preparation for the comprehensive exam that covers the entire course in the event that you need to take it.

ALTER YOUR EXPECTATIONS FOR STUDYING. Research consistently shows that college students greatly underestimate the effort and time it takes to do a quality job of learning the new and complex material that is a part of most of your courses. Academic experts generally agree that, for a typical three-semester hour course, spending about 9 hours per week outside of class working on learning is the norm for reasonable achievement. However, if the course is particularly difficult or if your skills are not as great as the typical students', you will likely need to spend even more than 9 hours per week to do well in the course.

KEEP THE BIG PICTURE IN MIND. Not only must you learn quite an amount of information that you might consider rather detailed, but you should also strive to understand the broader themes and context at all times. Keep in mind what you have learned in previous chapters and lectures. Themes work best when understood together rather than in isolation. In fact, individuals who, after a course is completed, have gone back and reread the textbook, report considerably greater understanding of material partly because the context has changed (e.g., they perceive chap. 2 differently after having studied chapters 3 and 4).

IF YOU HAVE QUESTIONS, ASK THEM. Class time is not the appropriate time for individual specific questions about text material that you are unclear about, although good questions that extend or broaden what you have learned in the book or heard in lectures are strongly encouraged during classes. Such questions enrich class in general and are strongly encouraged. For more detailed questions, seek us out after class, during office hours, or make an appointment.

IF YOU HAVE PROBLEMS, SEEK SOLUTIONS EARLY. For example, if you do poorly on an exam, see one of us at that time (instead of later in the course). In addition, the Student Counseling Service (294-4357) exists to help students, whether the source of a problem is personal or academic. The Office of Information Service (294-4777) and the Student Assistance Center (294-4357) are also important resources for students. If we can help you or point you in the right direction, we certainly will, but you must ask for help first.
Procedures for Research Credits
for Students in SOCIAL PSYCHOLOGY (PSYCH 280)

There are two ways to obtain all 24 points of the Research Credits (12 points required; 12 extra credit): 1) Research Participation (Option 1) and 2) Current Directions essays (Option 2). You can do a mix of either option to get the 24 points. If you choose to do the Research Participation method and you are under the age of 18, you must have written parental consent. Written parental consent forms are available in the Course Information Office (Lago W004) or can be downloaded from the Psychology Home Page (http://www.psychology.iastate.edu). Students can participate in research studies through the last day of class. Current Direction essays are due each Friday beginning on Jan. 19th and ending on April 13th.

Option 1) Research Participation

Scientific studies are conducted each semester in the Department of Psychology. The professors in this course encourage participation in these studies because participating in psychological research can be an educational experience facilitating your understanding of social psychology. Participation is totally voluntary.

How do I sign-up for a research study?

All Psychology studies for Psych 101, 230, and 280 are listed on the Psychology Research Participation Website (SONA), located at: https://isupsych.sona-systems.com. Additional research times for some studies may be posted on the Research Participation Sign-up Boards across the hall from W162, W172, and W182 in the west wing of Lagomarcino Hall.

Your logon password for the website will be automatically created based on the class roster. Shortly after the start of the semester, you should receive an email in your university email address with your logon password information. Then, after you log onto the webpage, you can click the “my profile” option and change your password.

If you do not receive an email with your Research Participation Logon Password by 02/01/06, you should send an email to psychres@iastate.edu so an account can be created for you. When you send the email, please include your first and last name, university student ID number, and university email address (NetID).

Both SONA and the Research Participation Board posting forms provide the study name and number, a brief description of the study including time, place, and length of time required for participation, credit earned, and the name(s) and phone number(s) of the researcher(s). If you sign up on the Sign-Up boards, you should immediately complete your Research Participation Record Sheet (page 11 of this syllabus). This is your reminder of when and where to go and allows you to keep track of the number of credits you have earned. If you sign up on SONA, you will automatically receive a confirmation email with this information; some other studies may also send you a reminder email the day before your appointment.

All approved studies are posted in the online registration system. Approved studies are conducted on the University campus locations other than dormitories between the hours of 7:00 a.m. and 9:00 p.m.; some studies may involve completing online surveys. No deviations from these rules are authorized.

What can I do if I forget my password to the online research sign-up system?

To retrieve your lost or forgotten password, go to SONA at: https://isupsych.sona-systems.com/. Underneath ‘Lost your password?’ Click “Click here to retrieve it!” link, which will take you to: https://isupsych.sona-systems.com/lost_password.asp. Enter your NetID (i.e., NetID@iastate.edu), then click ‘Email Password’ button. SONA will resend an email to your iastate email account within the next hour that contains your password. For further information, please refer to: http://www.psychology.iastate.edu/index.php?id=151

If you receive a message saying, “System Message: Password could not be sent. No user was found matching the specified user ID.” You will need to send your first and last name, course type (psychology 101,230, or 280), and your Net ID to psychres@iastate.edu so an account can be created for you. Once your SONA account has been established you will receive an email to your iastate.edu account containing your password.

Can I sign up for a study more than once?

Typically, you are allowed to participate in each study only once. If you are allowed to participate more than once, the researcher will let you know.
What are my responsibilities once I sign up for a study?

Both you and the researcher are contracting to show up at the appointed time and place. BE ON TIME. By signing up, you are indicating that you plan to participate in that specific study given the information that is available on the posting form. If you are unable to make your appointment, cancel your participation on SONA or call the researcher or the Psychology Office (294-1743) at least two hours beforehand. Prompt cancellation of an appointment will allow another student to sign up for the study.

What happens if I miss a scheduled research appointment?
If you do not show up for a scheduled research appointment, your failure to attend the session will be recorded in SONA, and you will receive an e-mail message indicating that you have missed the appointment. After three missed appointments, your access to SONA will be suspended and you will have to pursue the other credit options listed in this syllabus. Be sure to check for deadlines associated with these alternative options.

If you know that you will be unable to attend a scheduled research appointment, you can cancel the appointment in the online sign-up system up to two hours before the scheduled time of the appointment. If you cancel an appointment at least two hours ahead of time, this will not be counted as a missed appointment in the system, and will not lead to a suspension of your account.

What can I do if my SONA account is suspended?
If you believe that an error has been made and your account was suspended accidentally, please contact the SONA administrator (psychres@iastate.edu). If your failure to appear was beyond your control, send an explanation to the administrator, who may reinstate your account. Alternatively, you may want to consider the other credit options listed in the syllabus to complete this assignment. Be sure to check for deadlines associated with these alternative options.

What should I do if a researcher does not show up for an appointment I scheduled?
Both you and the researcher are contracting to show up at the appointed time and place. If the researcher is unable to make a scheduled appointment, he or she should post a message telling you what you need to do to get your credit. If the researcher does not show and there is no note, wait for 10 minutes past the scheduled time and then immediately check SONA, your email confirmation, or the sign-up board to see whether you have the correct date, time, and location. If all the information is correct, go IMMEDIATELY to the Psychology Main Office in Lago W112 with this information, and complete a Researcher No Show Form. If the study is in the evening or on the weekend, then go to the main office the NEXT WORK DAY to complete the form. The form will be used to verify that there was a researcher no show and, once this is verified, you will receive credit for the study. The verification process requires that the form be completed as soon as possible after the no show occurs. Researcher No Show Forms WILL NOT be accepted more than 7 days after the scheduled appointment.

How long does a research appointment take?
The minimum appointment time for research studies is 50 minutes, although in some cases you may finish the study in less time. The maximum length of time for each study is listed on the sign-up sheet. You earn 1 credit for the first 50 minutes or less of a study, 2 credits for studies that require between 60-90 minutes, and 3 credits for studies that require 90-120 minutes. Some studies may require multiple sessions that are spread across different days.

What types of research studies are done?
There are many types of studies conducted in our department. For example, you might be asked to complete questionnaires, to view slides or videos, to listen to music or conversations, to interact with others in a group, or to make judgments on a computer. All studies are reviewed and approved in advance by the Iowa State University Institutional Review Board.

How does a study get approved?
The study is first approved by the Department of Psychology Human Research Ethics Review Committee to determine that no physical or psychological harm will result from the research and that the research is meaningful. After departmental approval, the study is reviewed by the ISU Institutional Review Board. Most studies are open to all Psych 101, 230 and 280 students, but some restrict participation to subsets of students (e.g., females only or left-handed persons only).
What should I do if I have a question about a specific study that I signed up for, such as its location, etc.?

If you signed up for the study on SONA, recheck SONA for that information. If you signed up on the Research Participation Board, you should have recorded the information on the tracking form on page 11. If you did not, then you should recheck the board to get the information. If you have questions not addressed on the SONA website or the posting form, you should get in touch with the contact person listed at the top of the sign-up sheet or on the webpage. If you do not get a response from the contact person, contact Ann Schmidt in the Psychology Department Office, W112 Lago, 294-1743.

If you were recruited for the study by telephone or e-mail, you should get in touch with the contact person. This person's name, the study number, and a description of the study should also be on SONA.

If I missed the mass testing session, can I make it up?

No, the pre-screening sessions are only conducted at the beginning of the semester on the dates announced in class. If a student is not able to attend the mass-testing sessions, he or she cannot earn the 2 credits given at the session. Typically at least one other large-scale questionnaire study is offered at another time during the semester, but participation in it will not qualify you to participate in other studies. Such studies will be announced in class and posted on the sign-up board.

What if I get called or e-mailed by someone in the Psychology Department who wants me to be in their study?

ONLY students who complete mass-testing questionnaires and indicate their willingness to be contacted may be called or e-mailed and invited to participate in a study. The caller will provide his or her full name and phone number, the study number, the experimenter's name, and the date, time, and location of the study. (This is important information, be sure to keep it.) You are under no obligation to participate in a study just because you are contacted by phone. If you agree to participate, check that an approved posting form with the same experimenter, study number, and location is posted on SONA before going to the appointment.

If the study is not listed on SONA or the bulletin board, do not keep the appointment and immediately notify the staff in the Psychology Office (W112 or 294-1743). If you receive a call or get an email recruiting you for a study, and you did NOT participate in mass-testing, you should immediately notify the staff in the Psychology Office (W112 or 294-1743).

What is the last day that I can earn research credits?

The last day to participate in research studies (Option 1) is the last day of class for the semester. Current Directions essays (Option 2) are due each Friday January 19th through April 13th. Only one essay will be accepted at each due date.

How is research credit recorded?

All credit, even that earned by sign-up on the Research Participation Board, should be posted on SONA by the researchers within 72 hours after the study. You can click the "My Schedule and Credits" option to see your credits. After each study, researchers will give you a Research Credit Receipt. If you do NOT receive credit within 72 hours after participation in a study, you should contact the researcher directly to find out why. You may be asked to show your Receipt. As described on page 11, you must keep the receipts in case there are any discrepancies at the end of the semester with the number of credits assigned to you on SONA. If there is a discrepancy, take the receipts to the Course Information Office.

What if I have other questions?

Please ask your instructor or contact the Course Information Office (294-8065 or e-mail psychinf@iastate.edu).
Option 2) Current Directions Essays

How do I complete the essay method?

Below is a list of readings from your Current Directions book. As a substitute to participating in research studies, you can read any of these nine articles and then write an essay in response to one of the three critical thinking questions for each article (listed at the back of each article). Each essay must be typed and double-spaced. Use either Times New Roman (12 point) or Arial (11 point) font. Margins must be 1 inch all around. Each essay must be between 550-600 words in length (approximately 2 pages). Each essay is equivalent to participating in a one-credit study. You can choose to write some essays and participate in some experiments to obtain all of your required research participation and/or extra credit points. If you choose to obtain all the 12 required research participation points through these essays, then you will need to turn in 6 essays to obtain these required points. If you choose to obtain all of the 12 extra credit points through these essays, then you will need to turn in essays to obtain these extra credit points. Essays will only count as extra credit after the 6 required research credits have been completed (either through research participation or essays or a combination). Please note that the essays based on the Current Directions readings are due on specific dates (see Question 2 below).

When are the essays due?

Deadlines for the essays are included in the Tentative Lecture and Reading Schedule. The first deadline for turning in an essay is January 19th, a Friday. The next essay is due on the following Friday, January 24th. As can be seen in the lecture schedule, beginning on January 19th, one essay is due every Friday through April 13th. Students can only turn in ONE essay on a due date. If a student wishes to complete all 12 possible essay assignments (6 for required research points and 6 for extra credit) they must turn in ONE essay at each deadline. These deadlines are instituted to allow us to be thorough in our grading of these assignments. Essays must be turned in during class, E-mail attachments are not accepted. If you miss a deadline, you can still participate in an experiment to obtain research points, but you may not turn in any essays late.

How are the essays graded?

Your score will be based on an all-or-nothing scale (you either get the 2 points or 0 points for each essay). A score of 0 points may be awarded if a student did not reach the assigned word length, failed to meaningfully answer the question, or is suspected of plagiarism.

What is the consequence of plagiarism or cheating?

A student found guilty of academic dishonesty will receive a failing grade for the applicable assignment/test. In addition, academic dishonesty may lead to suspension, conduct probation, or reprimand by the university.

List of Current Directions readings for the Essay Method

3. Fiske. “What We Know Now About Bias and Intergroup Conflict, the Problem of the Century” pp. 124-131
